

Pillar 2 solution
by Aunetic

Open new areas – succeed with our **Pillar 2 Solution**

**Guided and proven
process to cover
the complex Pillar 2
regulations**

- » Don't start from scratch – we provide you with the plan to get it done
- » Built-in best practices with real experience in managing complex tax processes
- » Foundation to build for the future, regardless of ongoing legislative changes (living the process)

- » **Our Expert Team:** Developed with insights from our team of tax advisors and former in-house heads of taxes, our solution is engineered to meet the unique needs of your business. Our hands on experts will guide you
- » **A Built-in Data Collection Process:** A process that makes it possible to work with automatic data collection and/or central manual data collection with the ability to automatically reach out to local reporters to gather data, is essential.
- » **Limit Required Resources** Reduce the number of entities which require a full data collection and calculation through an intuitive Entity Selection and Safe Harbor process.
- » **Guided Implementation:** Navigate the Pillar 2 implementation journey with confidence. Our solution offers a clear roadmap with actionable starting points and goals, guiding stakeholders through each stage for a smoother implementation experience.
- » **Collaborative Approach:** Identifying the necessary data points and knowing how these data points should be gathered needs to be done collaboratively and succinctly between the central team and local reporters.
